WELCOME TO THE GARDEN CENTER TOUR

Let Prospiant create a garden center structure that is uniquely you. From grand entryways and rooflines to exciting layouts and gorgeous features. Prospiant offers diverse possibilities that can fit any garden center's style, specifications and budget.

Our experienced team can help you think outside the box to create unique layouts and innovative configurations for your garden center.

Experience the possibilities for yourself. Join us for a tour of Prospiant structures and explore the exciting options available for your garden center.

CREATE A GRAND WELCOME

The elegant glass greenhouse provides an invitation to explore Linton's Enchanted Gardens.

The double-hipped entry truss at Olson's Nursery & Gift is the perfect fit for anyone with an L-shaped parking lot.

DID YOU KNOW...?

Our team of in-house professional engineers is licensed in 48 states. That means they can work with you to provide certified plans that meet local building codes.

Make a standout first impression and entice customers before they even walk in your garden center.

Prospiant can create a unique entryway that stands out while fitting in with your architectural style.

Prospiant can design a look for a single retail center or a chain of stores.

Blending new structures with existing garden center designs is important. At Linvilla Orchards, traditional wood siding and metal roofs on the Nexus structure complete the transition.

By painting the structures and glass extrusions, Wilson's Garden Center blended their entryway architecturally with the adjoining buildings.

This multi-hip entryway gives Black Diamond Nursery a distinctive look.

DID YOU KNOW...?

If you're looking to lower your carbon footprint, our options for passive venting, shade curtains, coverings and alternative energy will help. They'll also make your greenhouse more economical, helping you save money.

Unique architectural details like attractive painted posts and an extended covered entranceway create a dramatic draw for Sam Bridge Nursery and Greenhouse customers.

Hanging plants enhance retail spaces with high-clearance painted interior trusses, like these at The Rhoads Garden.

Draw added attention with a hipped roof or cupola, as seen here at McClish's Plants Plus Greenhouses.

BUILT TO YOUR NEEDS AND LOOK

There's a custom solution for your every need. The Prospiant Retail Team will work closely with you to create cost-effective, energy-efficient designs that maximize curb appeal and encourage shopper retention to drive sales. Extensive experience designing and building retail garden centers means our engineers can develop the perfect retail space for you, your plants and your customers. Whether you have multiple stores and want a consistent look or you have one garden center and want to be unique, whether you are looking for a traditional greenhouse like the Vail™ or an open roof like the Dual Atrium™, Prospiant has the solution.

As you continue this tour of garden centers, take some inspiration from the creative structure designs and use of materials and equipment. Prospiant experts also can customize your space with shade and energy curtains, heating, cooling and a variety of door types.

A single Atrium™ greenhouse with a brick knee wall and specialty end truss provides a focal centerpiece at Linton's Enchanted Gardens. Matching finials sit atop the greenhouse and the entrance cupola, blending the buildings together and complementing the weather vane.

These Zail greenhouses at Hoerr Nursery feature vertical ridge and side/endwall vents to save energy costs.

This lean-to provides a year-round retail environment at Scott's Floral. The copper trim plays to an upscale country look.

DID YOU KNOW...?

Our expertise doesn't end at the greenhouse structure. Our equipment line includes benching, ventilation, irrigation and more—everything needed to make your greenhouse complete.

Ladder bar trusses at Plymouth Nursery support flat shades to protect shoppers, plants and hard goods from direct sun or inclement weather.

Jerry's For All Seasons beautifully extends their retail space with a glass canopy attached to the large glass greenhouse. The greenhouse features a decorative stone knee wall.

YOUR COMPLETE GROWING ECOSYSTEM

Prospiant is so much more than greenhouses. We specialize in providing turnkey projects, from outside walkways to indoor cafes, from concept and planning through design and construction.

You can trust our expertise in creating dynamic retail spaces, optimal plant environments or specialty areas like insulated metal buildings for offices or storage.

There's nothing off-the-shelf about your experience with Prospiant.

The Atrium structure at Wilson's Garden Center features curved trusses and shade cloth, allowing for natural ventilation and lower energy costs.

Market Basket used a stone knee wall as a design element on the retail greenhouse, tying it to the solid entrance structure.

A covered walkway protects shoppers and provides an easy guidance system for the outdoor retail area at Stauffers of Kissel Hill Garden Center.

UNIQUE LAYOUTS & DIVERSE ENVIRONMENTS

Prospiant structures offer diverse options to create memorable shopping experiences and elegant spaces for holding retail plants. Our team works with you to optimize airflow and lighting and can provide shade and energy curtains, heating, cooling, storage buildings and retail benching to create the ideal retail environment.

At Mariani Gardens, the I-beam and ladder beam are ideal spots for lighting that puts plants and furnishings in their best light.

Under a curved gothic roof, the checkout counter at Cactus & Tropicals blends seamlessly with the retail shopping environment.

The retail greenhouse at George's Market & Nursery features wide aisles for a customer-friendly layout.

DID YOU KNOW...?

Prospiant is dedicated to being eco-friendly—in addition to energy-saving building options, we follow green practices in our manufacturing facilities and offices.

This gorgeous structure at Breezy Gardens serves as a perfect wedding location.
