

# DESIGN BUILD SOLUTIONS

Design to Install, We Handle It All

**PROSPERANT**  
GREENHOUSES

# EXPERTISE YOU CAN TRUST

## THE POWER BEHIND PROSPIANT

With more than 170+ years of combined experience and thousands of successful projects behind us, we bring unmatched expertise in greenhouse design, engineering, manufacturing, construction, and long-term service.

Our team has helped the most successful growing operations across North America operate more efficiently and with greater confidence by delivering the highest quality, best-crafted, and most reliable greenhouse structures and systems in the industry.

More than 10,000 growers and researchers have trusted us to deliver greenhouse solutions that perform—season after season.

**LET OUR EXPERIENCE BE YOUR ADVANTAGE.**

### DESIGN

- ✓ Design and Consultation Services
- ✓ In-house engineering for all disciplines
- ✓ Value Engineering

### BUILD

- ✓ Engineering
- ✓ Structure, Glazing, and Screening
- ✓ Site Development

# CAPABILITIES YOU CAN COUNT ON

## INTEGRATE

- ✓ Climate Control Systems
- ✓ Automation and Growing Systems
- ✓ Heating and Cooling Systems
- ✓ Irrigation and Sterilization Solutions

## OPERATE

- ✓ Operations and Maintenance
- ✓ Ongoing Support, Training, and Education

# DESIGN WITH SKILLED PROFESSIONALS

The initial design phase of your greenhouse or indoor grow project may seem overwhelming due to the many critical factors you must consider before construction begins.

Our comprehensive design and architecture services for commercial greenhouse projects include:

- Initial site development and permitting
- Greenhouse design and planning
- Architectural design and engineering
- Project budgeting
- And more...

We can offer you expert recommendations for your building project on:

- Greenhouse orientation
- Greenhouse footprint
- Structure types and styles
- Glazing material options
- Heating and cooling considerations
- Greenhouse-specific equipment recommendations

Our design capabilities also include:

- Conceptual drawings
- Architectural renderings
- Contract drawings
- Engineering specifications
- Cost estimating
- Value engineering
- Construction scheduling

**Prospiant's structural engineers can design structures for a wide range of wind, seismic, and snow loading conditions in the U.S.**

# BUILD WITH CONFIDENCE

- ✔ With an average of 12 years field experience, third generation crew members, and continuous training of each crew member, Prospiant's construction crews have the knowledge and the background to ensure a quality installation of your project.
- ✔ Safety is a priority with Prospiant. Both new and experienced crew members strictly adhere to Prospiant's written safety program.

- ✔ Prospiant's materials and labor proposals offer installation of all structures and equipment within the respective proposal. This eliminates the need for you to obtain crews to install materials purchased, allowing you to focus on your business.

It's not enough to bundle best-in-class technologies together and expect a greenhouse or indoor growing facility to flourish. Managing a greenhouse project from inception to completion, with project managers on-site and engineers engaged the whole way through, is what separates us from our competition.

Our greenhouse general contracting ensures you have a team that knows how to build and install your greenhouse and integrate all relevant greenhouse automation equipment properly.

The months following a build-out are the most crucial to getting a facility optimized for productive harvests.

With a variety of greenhouse general contracting services, we work with you collaboratively throughout the greenhouse design and build process to ensure your specific needs are met and that you know how to control your new systems.

The greenhouse general contractor services we offer include:

- Value engineering
- Site review/evaluation
- Compliance review
- Utility infrastructures
- Project management
- Civil work
- Storm water management
- Construction/installation

We're proud to be a single-source solution provider to help you get the best result!

# YOU CAN COUNT ON OUR EXPERIENCED TEAM

From new construction to renovation, Prospiant's construction crews are building the country's most diverse greenhouse structures. Prospiant's crews are experienced in all facets of greenhouse construction, including structures and related equipment. Whether it be a retail garden center, growing range, university, bio-safety containment greenhouse, or conservatory, Prospiant is qualified to construct your facility.

## Your Satisfaction is our Top Priority

Prospiant provides custom greenhouse design and design/build services for even the most complex projects.

Our in-house team of designers, engineers, horticulturists, system integration specialists, and construction managers brings deep expertise to ensure every solution meets the specific needs of the end user.

From concept through specifications, equipment plans, architectural drawings, and installation, our goal is to ensure you end up with a fully functional greenhouse, built to the highest possible standards at the lowest possible cost.

Drawing on decades of greenhouse experience, Prospiant has helped many growers, researchers, and universities make informed, confident greenhouse decisions. We can help you, too.

### CANADA FACILITY

2035 Spinks Dr,  
Kingsville, ON N9Y 2E5  
+1 513-242-0310

### U.S. FACILITY

7108 Shona Drive,  
Cincinnati, OH 45237
