THE RETRACTABLE ROOF

THE HANGING SYSTEM WITHOUT HOOKS

Novavert HS² is a hanging system without hooks. Now available from Prospiant!

The HS² roof system is a modular screen system for horticulture that bypasses sewn-on tapes or hooks for much easier installation.

It combines stability, easy handling, durability and total flexibility. The system can be combined with different roofing materials, thus being adaptable for practically any application.

Choose from a wide variety of highly transparent films to protect your crop areas from rain, hail, and frost. Panels can be swapped quickly and easily to change the covering.

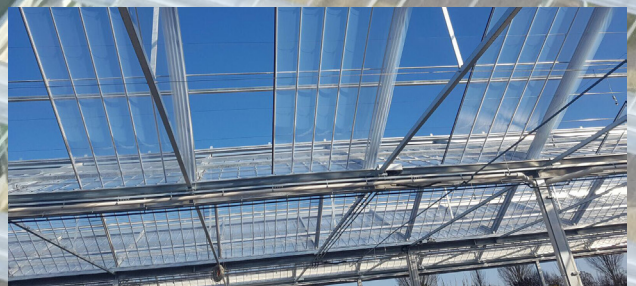

With the optional battery-powered remote-controlled HS2 Skytrain, you can easily position the ropes needed for roof panel installation or replacement from the side of the greenhouse, without crossing the cultivation area or disrupting the crops.

STABLE, SIMPLE, AND OPTIMAL SERVICE POSSIBILITIES

STABLE

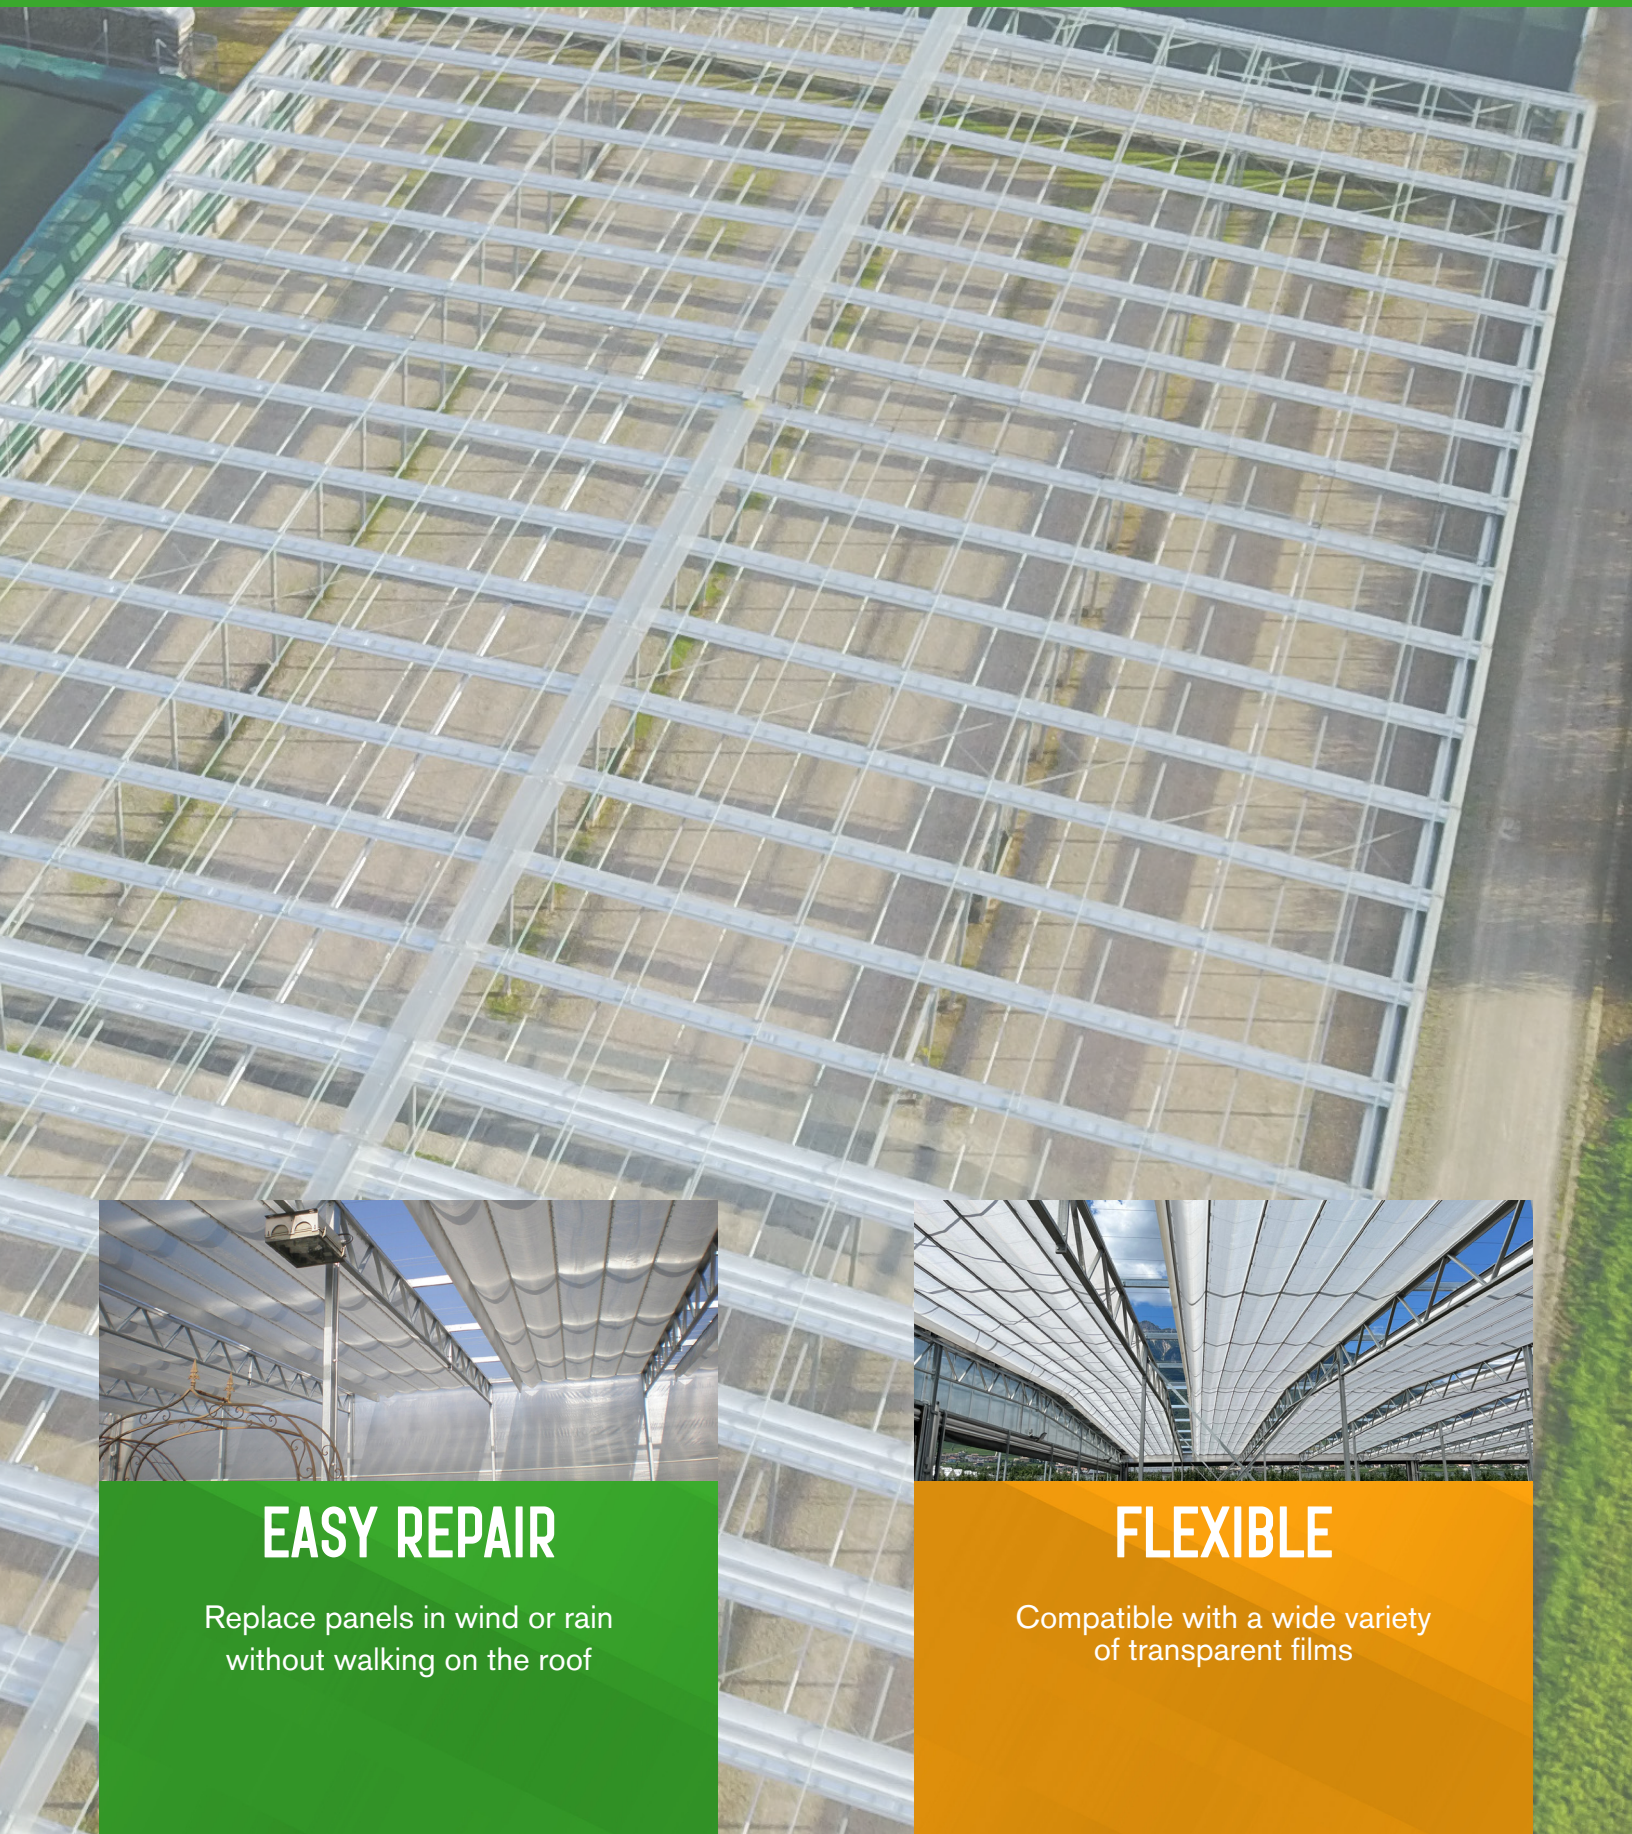

Tensioned wires minimize wind damage and film movement

FAST INSTALL

No crossing the cultivation area, HS² Skytrain positions the pulling ropes

BY NOVAVERT

EASY REPAIR

Replace panels in wind or rain
without walking on the roof

FLEXIBLE

Compatible with a wide variety
of transparent films

WE DESIGN, MANUFACTURE, AND BUILD GREENHOUSES

Prospiant has a strong legacy, built on the foundation of three industry-leading brands. With more than 170 years of combined expertise in greenhouse manufacturing, design, construction, and integration, our employees support customers in the commercial floriculture and nursery, retail, institutional, and produce markets.

- ✓ **Design and value engineer* your project**
- ✓ **Build with local manufacturing and general contracting**
- ✓ **Integrate the perfect growing environment**
- ✓ **Operate your facility in optimum condition**

*We work with partners to ensure proper, compliant performance of engineering and design services.
